APPLICATIONS

This meter is specially developed for measuring or monitoring electromagnetic field, for example: cell-phone station, hospital equipment, radar, micro-wave oven, radiation work, TV antenna, Radio station, welding equipment, baking- equipment, television, computer, factory, laboratory, and other environment...etc.

SAFETY INSTRUCTIONS

Danger

- * For worker's safety, be aware that persons with electromagnetic implant (e.g. cardiac-pacemarker) are subject to especial danger in some case.
- Particular to observe the local safety regulations of the operator of the equipment.
- * Before using the device, it need to know that how to setting " alarm-limit " value.

Attention

- ^{*} Claims by some scientists that long term exposure to electromagnetic field may be the cause of childhood leukemia & other forms of cancer.
- * Complete answers to any of these and related questions are not currently available. At the present time the most common practice is to avoid excess exposure over long period of time.
- Complete answers to any of these and related
 " Prudent Avoidance " as stated by the Environmental Protection Agency(EPA) USA is recommended.
 * According to ICNIRP of reference levels to time-varying
- electromagnetic fields, The E-field strength levels are:
