MI 3099 Demonstration Board

AUTO SEQUENCE demonstration

Demonstration board MI 3099 simulates typical electrical installation usually met in individual houses or apartments with important elements on switchboard and on circut site. Demonstration board is intended for use preferably by sales personnel when demonstrating operation of electrical installation test equipment, especially the new Metrel's electrically installations safety testers with built-in AUTOSEQUENCE procedure (MI 3101 EurotestAT and MI 3105 EurotestXA).

Key features:

- The board contains real elements of electrical installation like RCD, mains switch, automatic fuses, switches, lamps, 1-phase and 3-phase mains test outlet, N and PE collector
- All standardised testing methods can be presented.
- TN or TT system with or without RCD can be simulated.
- Possibility of connection to single phase or 3-phase supply system.
- Various Autosequence test procedures are supported for demonstration of testing safety by new EurotestAT and EurotestXA.
- Demonstration board is put in the strong rugged case with a handle for comfortable carrying.

Application:

- Presentation of complete testing of any electrical installation.
- Demonstration of electrical installation test equipment operation by sales per-sonnel.

Standards:

Electromagnetic compatibility: IEC/EN 61326 Safety: IEC/EN 61010-1

Ordering information

Standard set

MI 3099

- Demonstration board MI 3099
- Jumper
- Special probe, 3 pcs
- Mains cable
- Three phase to one phase adapter
- Instruction manual
- Calibration certificate
