

5104-IEC

Designation : 1500 V CAT III alligator clip with 4 mm banana female terminal.

Designation.	Safety alligator clip with 4 mm banana female terminal.
Full designation.	1500 V CAT III alligator clip with 4 mm banana female terminal.
Connection durability (temporary or semi-temporary or durable).	Semi-temporary connection. A few hours. The alligator clips are designed for a few hours continuous connections typically.
Strength.	Maximum safety. Compliant with the photovoltaic panels supplying the highest voltage, 1500 V DC.
Applications.	General purpose electric and electronic testing, controlling, and measuring. The safety complies with direct current (and alternating current), as a result the alligator clips can be used on electric vehicles and hybrid electric vehicles, and photovoltaic panels.
Safety.	1500 V CAT III / 1000 V CAT IV, reinforced insulation, 20 amperes, according to EN / IEC 61010-031. Alternating current and direct current, AC / DC. IP2X according to EN / IEC 60529 when the jaws are closed, to reduce the risk of short-circuits and arc flashes.
Colors.	Black Red Green Blue Yellow Brown Gray
Packaging.	Set of 10 alligator clips of the same color (default packaging).
Part number.	5104-IEC- Color
